

PROJECT NAME

Eiphes Ultimate Gallery Plugin

OBJECTIVE

The Ultimate Gallery plugin will be designed for sale to the public. The plugin brings some of the features of "smugmug" to user's wordpress installation: Comments, users can "rate" images, supports 4 gallery styles: Masonry, Full Screen, 3 Row, and 4 Row. The front-end is beautiful, easy-to-use, and mobile responsive. See "General Features" (below) for more complete list of features

REQUIREMENTS

- Use private github repo for project communication and code updates (existing code Based on [Hugh Lashbrooke's WP Plugin Template](#). Shell script has already been run)
- Regularly push "live" updated version of plugin for testing.
- Mobile Responsive design
- Must work on all modern browsers and devices.
- Some simple backend documentation (or extensively commented code) for the benefit of other developers that may have to provide support for the plugin in the future.
- Must meet all standards to be for sale to public.
- Integrate plugin with [this software licensing API](#)

TEAM

Project Manager - David Anthony
